

Per MG Rolya direction

1. Briefed BG Smith on 2 Oct. He originally felt that he should not make any decision on appointing anyone to head the GF effort within INSCOM. That it should be BG Freeze's area of responsibility since the immediate application of the techniques obviously fall into the PI side of intelligence. BG Smith changed his mind and directed that COL Cary at Fort Meade, DCSCI, be briefed.
2. Briefed COL Cary on 3 Oct. He felt that the focal point should be selected from the Headquarters area at AHS. I agreed. COL Cary talked it over with BG Smith and persuaded him to make this an IAOPS responsibility. I was told to brief Mr Garrett, acting director of operations at AHS.
3. Mr Garrett was briefed on 3 Oct.
4. On 4 Oct Mr Garrett said that LTC Kane was the INSCOM Focal Point.
5. On 5 Oct, a GF planning meeting was held at OACSL. Dr Targ (SRI), COL Deprospero (AMSAA), COL Capps and LTC Kane were among those attending. The purpose of the meeting was to come to agreement on statements of work for proceeding on the Short Term GF approach. The following points were agreed to:
 - a. That SRI would "train" the team chief soon, possibly in Oct. The team leader would also view any on-going SRI-AMSAA experiments at Ft Ord.
 - b. That beginning in April 79, SRI will intense train three other subjects
 - c. That later this year or early next, SRI will send a staffer to Washington to interview the INSCOM subject nominees
 - d. That neurophysical testing at Stanford will be part of the Subjects' training
 - e. That a promising new method of subject reinforcement, computer driven, will be utilized.
 - f. That the statements of work/tasking will be added to those on the AMSAA-SRI agreement.
 - g. That AMSAA will be willing to cooperate in any way with the INSCOM team.
6. Funding level of \$75K has been transferred to AMSAA
7. Dr Haley of DARCOM has asked for a meeting of all DA "players" next week.
8. LTC Kane will brief MG Rolya next Tuesday. Kane and I will meet today to discuss details of recommended future approaches.

9. A smooth transition is anticipated and these will hopefully be brought back to more security matters.
